

KHS S1 Eco Project (Music), December 2008

So we've made real music from a pile of junk! What can we do now?

Visit The Junkman (Donald Knaack's site)

Here's the movie we watched (Sundance Film Festival Performance):

<http://www.junkmusic.org/media.php?view=95>

And the podcast we listened to:

<http://www.junkmusic.org/media.php?view=235>

Some more music to listen to:

<http://www.junkmusic.org/music.php>

And the **really important environmental stuff**, which includes the HOP Program and Environment Facts & Fun:

<http://www.junkmusic.org/projects.php?cat=3>

Listen to the Vermont Public Radio interview with Donald Knaack

http://www.vpr.net/news_detail/80270/

Try some more 'junk music' projects for ourselves (PTO)...

There are many helpful websites which you can find by Googling appropriate words (use your imagination!), but here are some to get you started:

<http://www.satisfied-mind.com/>

(Some interesting projects including a washtub bass, mountain dulcimer, mini steel drum and thumb piano)

<http://www.philtulga.com/HomemadeMusic.html>

'where common household items are transformed into musical marvels using math and measurement!'

<http://www.rhythmweb.com/homemade/>

'When you use your imagination to make or find percussion instruments for yourself, you are following a tradition that stretches back thousands of years to the dawn of human music making. It's an essential part of being a percussionist.'

So have fun, but think about what you throw out and what we waste as a world!
